## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I (Claims 1-4) and Species II (Fig. 2) in the reply filed on 8/23/2007 is acknowledged.

### ***Status Of Claims***

Claims 1-4 and newly filed claims 9-14 are pending and have been examined.

Claims 5-8 are drawn to non-elective claims and being withdrawn.

### ***Claim Objections***

Claims 1 and 2 are objected to because of the following informalities: a citation "the folding of said segment" does not have antecedent basis. Appropriate correction is required.

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-4 and 9-14 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 7,070,314. Although the conflicting claims are not identical, they are not patentably distinct from each other because all of the features of the instant claims are included within the patented claims. For example, the instant independent claims 1-4 are corresponding to the patented independent claims 1, 5, and 9 except for the instant claims are further cited of using a laser for cutting method and a folding step for forming a shape of conical or pyramidal shapes, etc. It would have been obvious to one having ordinary skill in the art at the time of the invention was made to use a laser tool for cutting a harden material object and fold the object into a different shape (e.g. conical or pyramidal shapes for skylight).
